

1. Determine if the following triangles are similar and show how you decided. If they are similar write a similarity statement.

2. Looking at the triangles in the figure on the right:
- Are the two triangles similar? How do you know?
 - What is the length of QT ?
 - If PT is 15 cm, what is the length of RT ?

3. Is the following pair of triangles similar? What postulate/theorem could you use? Show your work.

If $a = 18$ what is the value of x ?

4. Tonya is 1.3 meters tall. She stands 7 meters in front of a tree and casts a shadow 1.8 meters long. How tall is the tree?

5. Stanwick is 6ft tall. The telephone pole he is standing next to is 40 ft tall. If Stanwick's shadow is 4 ft, how long is the shadow of the telephone pole?

6. Identify the image, pre-image, dilation, and scale factor of the following dilation with a center at the origin.

7. Under a dilation of scale factor $\frac{1}{3}$ with center at the (1,1) if A is (4,10), B is (7,4), C is (13, 13), what would the coordinates for A', B' and C' be?

8. Under a dilation of scale factor 3 with center at (2, -2).) if A is (-1,-1), B is (-2,-2), C is (-2, 1), and D is (-1,2) what would the coordinates for A', B', C' and D' be?
